1 Begin with a square, plain side up. Fold in half and then unfold.

2 Fold the bottom corners to meet the center crease.

3 Turn over.

4 Fold the bottom edge to meet the center crease, allowing the hidden flap behind to flip outwards.

5 Swing the top flap over.

6 Fold over to the center crease.

7 Fold the corner outwards at a slight angle.

8 Fold the top section over along the center.

9 Fold over the left side (like you did in step 4).

10 Swing over the flap.

11 Fold over to the center crease.

12 Fold the corner outwards, so it matches the other flap at the side.

(OVER)

FULL ELEPHANT

DIFFICULTY LEVEL: MODERATE

13 Fold the top section over along the center.

14 Turn over.

15 Fold the sides in just enough, so that the top colored triangles get folded in half.

16 Fold the top section down (this fold extends from corner to corner).

17 Fold the top section behind (this fold lies just below the colored edge).

18 Form a light crease by folding the bottom tip up to the top edge, and then unfolding.

19 Fold the top edge to the crease you just made.

20 Fold the sides inwards. Part of the fold will be hidden by the top colored triangles.

21 Turn over.

22 This completes the head of your elephant.

23 Start with another square plain side up. Fold it in half.

24 Fold the sides in at a slight angle to create the legs for your elephant.

25 Attach the head to the body with either glue or tape.

26 Completed Elephant.
